

Robotic Liquid Handling Consumables and Services

JVR Scientific is a provider of automation friendly robotic liquid handling consumables and services. These newly designed products for robotic systems come from our combined twenty years experience in laboratory automation and manufacturing.

In addition to our consumable products, JVR Scientific has knowledgeable service technicians on staff to program and service your robotic liquid handling needs. These services include:

- Volumetric pipeting calibration
- Script programming for Gemini, FACTS, EVOware, EVOware Plus
- Liquid class optimization
- Gravimetric testing

Your purchase of our products will earn you credit to purchase these automation services.
